

Senior Software / Solution Engineer

Who are we?

BioLizard is a growing scale-up company providing bioinformatics and software engineering solutions for customers in biotech, pharma and academia. Typically, a lizard adjusts to its surroundings and that is exactly what we do. At BioLizard we adapt to our customers' data environment! The research field is rapidly becoming more data-driven. We strive towards offering state-of-the-art bioinformatics, software development and machine learning solutions to help solve our customers' biological questions.

As a Software Engineer, you will have the opportunity to work on exciting multidisciplinary projects within biotech and biopharma. Your responsibilities include designing, developing, testing, maintaining and documenting solutions, taking into account the architectural guidelines and the client's needs in order to optimise the software application and to have it meet the predetermined standards. Additionally, you will assist in (further) developing existing or new pipelines, interfaces, apps, etc.

Do you love working in a multidisciplinary team, using the newest technologies and are interested in the biotech, pharma and diagnostic sector? Then don't hesitate & apply now!

Keywords

Solution-oriented – Independent and team player - Multidisciplinary – Positive and open-minded - Eager to learn - Data-driven - Analytical mindset - Bioinformatics expertise
