

Senior bioinformatician

Who are we

BioLizard is a growing start-up company providing bioinformatics solutions for our customers in biotech, pharma and academia. Typically, a lizard adjusts to its surroundings. That is exactly what we do, we adapt to our customers' data environment! The research field is rapidly becoming more data-driven, where we strive towards offering state-of-the-art bioinformatics, statistics and machine learning solutions to help solve our customers' biological questions. Our habitat is the stretch of land where both biologists, informaticians and statisticians, both experts and juniors, both academics and company employees reside.

Our senior bioinformaticians are embedded in the working environment of our customers in a full-time or half-time regime, collaborating on challenging projects in life science. You will contribute to devising solutions in data integration, analysis pipeline implementation, information visualization and data learning. Experimental design, software development and computational omics are familiar to you. You play an important role in coaching our junior bioinformaticians also functioning as the point of contact to our network of academic specialists, following up on professional and personal development.

Keywords

Analytical mindset – Eager to learn – Independent and team player - Multidisciplinary - Solution-oriented – Positive and open-minded – Assistant and motivating – Taking initiative

Job requirements

- PhD in computer science, bioinformatics, (bio)engineer, biotechnology or equivalent, or relevant working experience in biotech/pharma industry
- Broad experience in either bioinformatics, biostatistics and/or machine learning
- Proficiency in at least one programming language is required (e.g. Python, R, ...)
- Experience in tool/pipeline development in multi-omics environment
- Willing and able to learn and implement new technologies
- Profound knowledge in life-sciences (molecular biology, health care) is required
- Fluent in English, with good communication skills towards both (non-)specialists
- Willing to travel when the need arise (depending on project)

Job offer

- A challenging and motivating work environment where like-minded people strive towards top-grade results in a continuously evolving research domain
- A personal growth trajectory focusing on self-development and gathering knowledge
- Project guidance together with senior profiles and our academic network of experts
- An attractive salary package with additional benefits
