

## Bioinformatics software engineer

### Who we are

BioLizard is a growing company providing bioinformatics and software engineer solutions for our customers in biotech, pharma and academia. Typically, a lizard adjusts to its surroundings and that is exactly what we do. At BioLizard we adapt to our customers' data environment! The research field is rapidly becoming more data-driven, where we strive towards offering state-of-the-art bioinformatics, software development and machine learning solutions to help solve our customers' biological questions. Our bioinformatics scientists and software engineers are embedded in the working environment of our customers in a full-time or half-time regime, collaborating on challenging projects in life science.

As a **bioinformatics software engineer**, you will have the opportunity to work on exciting multidisciplinary projects within biotech and biopharma. You'll be working on some of the most challenging data and interfaces as part of an international multidisciplinary team with real career opportunities. Do you have an excellent knowledge of back-end and ETL, with interest in front-end technologies and are you up for a challenge? Do you love working in a multidisciplinary team, using the newest technologies and are you interested in applying your skills in the biotech, pharma and diagnostic sector? Perfect! Don't hesitate & apply now!

### Keywords

Programmer skills – Eager to learn – Independent and team player - Solution-oriented – Positive and open-minded
