

Associate biostatistics scientist

Who we are

BioLizard is a consultancy company providing bioinformatics, data science and data management solutions for our customers in biotech, pharma and diagnostics. Typically, a lizard adjusts to its surroundings. That is exactly what we do, we adapt to our customers' data environment! The research field is rapidly becoming more data-driven, where we strive towards offering state-of-the-art data science, bioinformatics, statistics and AI solutions to support our customers with true data-driven knowledge generation. Our habitat is the stretch of land where biologists and data scientists, computer scientists and statisticians, both experts and juniors, both academics and company employees reside.

As an associate biostatistics scientist, you are actively collaborating with the clinical, R&D or data science departments of our customers. You will contribute to the implementation of statistical analysis plans for diverse applications in the life sciences. Advanced statistical methods and experimental design are familiar to you, and you are eager to apply this knowledge in a range of scientific projects. You will be part of a dynamic team of fellow statisticians, bioinformaticians and data scientists, who work together to provide complete and high-quality analytical solutions to our customers. You will be involved in regular contacts with our customers and our large and diverse network of private partners and academic specialists, where you will get the opportunity to grow and flourish in the booming international life science ecosystem.

Keywords

Analytical mindset – Eager to learn – Independent and team player – Multidisciplinary – Solution-oriented – Positive and open-minded – Customer empathic

Job requirements

- Master degree in biostatistics, mathematics, data science or equivalent
- PhD is a plus, but not required
- Expertise in advanced biostatistics is a must
- Experience with clinical trials research is desirable
- Proficiency in at least one programming language (R, Python,...) is a must
- Willing and able to learn and implement new technologies
- Knowledge or background in life-sciences is considered an advantage
- Fluent in English, with good communication skills
- Location: preferably Belgium, but this is not a must

Job offer

- A challenging and motivating work environment where like-minded people strive towards top-grade results in a continuously evolving research domain
- A personal growth trajectory focusing on self-development and gathering knowledge
- Project guidance together with senior profiles and our academic network of experts
- An attractive salary package with additional benefits
