

(Senior) biostatistics scientist

Who we are

BioLizard is a consultancy company providing bioinformatics, data science and data management solutions for our customers in biotech, pharma and diagnostics. Typically, a lizard adjusts to its surroundings. That is exactly what we do, we adapt to our customers' data environment! The research field is rapidly becoming more data-driven, where we strive towards offering state-of-the-art data science, bioinformatics, statistics and AI solutions to support our customers with true data-driven knowledge generation. Our habitat is the stretch of land where biologists and data scientists, computer scientists and statisticians, both experts and juniors, both academics and company employees reside.

As a (senior) biostatistics scientist, you are actively collaborating with the clinical, R&D or data science departments of our customers. You will be designing and implementing data analysis plans for diverse applications in the life sciences. You are able to delegate tasks and provide guidance to your junior colleagues. Advanced statistical methods and experimental design are familiar to you, and you are comfortable working with biological and/or clinical data. You play an important role in functioning as the point of contact to our customers and our large and diverse network of private partners and academic specialists, where you will get the opportunity to grow and flourish in the booming international life science ecosystem.

Keywords

Independent and analytical thinker – Leader and team player – Multidisciplinary – Solution-oriented – Communicator – Eager to learn – Positive and open-minded – Customer empathic - Take initiative

Job requirements

- At least 4 years of experience in statistical data analysis
- Expertise in advanced statistics is a must
- Experience with clinical trials research is desirable
- Proficiency in at least one programming language (R, Python,...) is a must
- Experience in data science, AI or data mining of scientific or healthcare data is a plus
- A basic understanding of biological data and its analysis is an advantage
- Software development skills are considered an advantage
- Willing and able to learn and implement new technologies
- Knowledge or background in life-sciences is considered an advantage
- Fluent in English, with very good communication skills
- Location: Belgium, The Netherlands or France (hybrid)

Job offer

- A challenging and motivating work environment where like-minded people strive towards top-grade results in a continuously evolving research domain
- A personal growth trajectory focusing on self-development and gathering knowledge
- Project guidance together with senior profiles and our academic network of experts
- An attractive salary package with additional benefits
