

## Senior AI expert

### Who we are

BioLizard is a consultancy company providing bioinformatics, data science and data management solutions for our customers in biotech, pharma and diagnostics. As a team lead, you will be responsible for leading and managing a team of bioinformatic scientists who collaborate with the clinical, R&D or data science departments of our customers. You will be expected to provide strategic direction, manage the team's workload, and ensure that projects are delivered on time and to the highest standards.

As a senior AI expert, you will also be responsible for building and maintaining strong relationships with our customers, and our large and diverse network of private partners and academic specialists. You will be the point of contact for our customers and will work with them to design and implement data analysis plans for diverse applications in the life sciences. You will also be expected to delegate tasks and provide guidance to your junior colleagues, ensuring that they are growing and developing within the team.

### Keywords

Independent and analytical thinker – Leader and team player – Multidisciplinary – Solution-oriented – Communicator – Eager to learn – Positive and open-minded – Customer empathic - Take initiative

### Job requirements

- At least 8 years of experience in data analysis
